

## FOR BEST RESULTS:

1. Only apply nematodes at **dusk**. Do **NOT** apply at other times, even if overcast! Avoid high UV.
2. Do not apply when the ambient temperature exceeds 32°C, or the soil temperature exceeds 25°C.
3. Avoid high or drying winds.
4. Ensure treated area is **irrigated** both **before** and **after** application of nematodes.
5. Apply nematodes as evenly as possible as they don't travel far.
6. Maintain moist soil conditions for not less than 7 to 10 days after treatment.

### Precautions:

100% Safe for people, pets, plants and even earthworms!

**Registration status:** exempt AVMPA

**Note:** Commonsense precautions for use of this product.

Include, but are not limited to the following:

-Keep out of reach of children.

-Avoid spills, splashes and excessive eye and skin contact.

-Wash hands after handling and use.

**Formulation:** 50:50 free living Entomopathogenic Nematodes & Micro - cellulose.

## Biological Control Solution

ecogrow

BETTER PLANTS • BETTER WORKPLACE • BETTER PLANET

## Termite Treatment

Non-toxic Termite (White Ant) Treatment

### ACTIVE INGREDIENT:

Each pack contains a minimum of 12 million infective juvenile nematodes (*Steinernema carpocapsae*) in a moist inert cellulose carrier.

Bio-control of House Termites in termite gallery situations.

### STORAGE:

As the product is made up of living organisms, it must be stored in a refrigerator (4 – 8°C).  
Product can be stored for 3 – 4 weeks.

Apply as soon as practical once you have received the product.

## APPLICATION RATES:

The kit allows for up to three separate applications 10 days apart for small infestations.

For larger infestations you may need to re-order to re-apply. Apply at least twice.

Apply anytime as a curative when the pest is visible.

This nematode species is an ambusher type and must remain moist.

The product cannot be applied too heavily.

It is to be used only for the treatment of *Coptotermes acinaciformis* and *Schedorhinotermes intermedius* (the most common in house destruction).

## DIRECTIONS FOR USE: (APPLICATION INSTRUCTIONS)

Avoid applying when temps are above 30C at the time of application.

**Kit Contents** – Up to 3 applications provided.

3 x 12 Million nematode packs (Refrigerate unused product)  
3 x 5 gram gel sachets (water storing crystals)

1. Mix 12 Million nematodes with a minimum of 1 litre of tepid water. Mix 20-30 minutes before use. Add one pack of gel while stirring and allow the gel to absorb the nematodes.
2. Apply gel using a squeeze bottle or similar to the termite gallery. Try not to cover the path of the workers.
3. Refrigerate the two other packs and apply every 10 days or as needed. Apply in a separate location if possible.

## LIMITATIONS:

This product should be used as part of an integrated approach.

It will control termites for 4-8 weeks in most situations. It is important to apply a physical or chemical barrier to prevent reinfestation.

Always seek advice from accredited and licensed pest control operators.

With care this product can be applied by householders. No liabilities are given or accepted for use of this product.
